“

Quality means doing it
right when no one is looking.

”

- Henry Ford

 **TEKMAK**
INDUSTRIALS

With a young, skilled and dynamic workforce, we at Tekmak Industrials are engaged in sourcing and machining precision castings for valves and pumps. With an in-house product development and machining setup we excel at delivering application-ready components in short lead times.

We have the experience of sourcing good quality steel and high alloy castings from reputed foundries. Our excellent machining and tooling setup has the capability to machine to the highest standards of quality at competitive costs.

OUR CAPABILITIES

MATERIAL

Our factory is located at Coimbatore, which is the largest foundry based city in South India. We have the capability to develop and source steel and other special alloy castings from a network of foundries in Coimbatore.

MACHINING

In a short span of time we have earned the trust of customers in machining a wide variety of components and materials. We have machined:

- Various materials that include steel, stainless steel and other high carbon steels
- Components weighing 500g to 500Kg
- GD & T tolerances under 0.02mm and centre distance tolerances of 0.01mm/100mm

- Ra (Surface finish) values of 0.2 in milling and 0.2 in turning
- Diameters upto 350mm at a tolerance of ± 0.01 in HMC
- A tolerance of 0.02mm in back boring at 6D length in HMC
- Various types of valve bodies ranging from 4" to 16"

ENGINEERING

Our highly motivated and skilled team is capable of

- Designing Jigs, Fixtures and Tooling
- Developing a new part within a short time
- Machining castings to suit stringent requirements
- Handling small lots and prototypes
- Ensuring quality at every stage on every part

OUR FACILITIES

Our factory, equipped with best technology and skilled machinists is located in a 8,000 sq ft facility in Coimbatore. Tekmak adopts and follows the best practices in the industry, and is ISO 9001:2015 certified.

With our machining setup, we have the capability to execute all jobs in house with meticulous attention to detail. We always try to employ innovative and effective methods of machining, and have developed a wide range of products with consistent quality.

MACHINERY

- Horizontal Machining Centre (HMC) - 2 nos
- Vertical Turret Lathe (VTL) - 2 nos
- Horizontal Turning Centre (HTC) - 2 nos
- Vertical Machining Centre (VMC) - 3 nos

South Asia
ISO 9001:2015 Certified

Tekmak has always stood for quality products and services at competitive costs. To support our machines we have the best instruments and a qualified team that ensures dimensional accuracy.

QUALITY INSTRUMENTS

- FARO Edge 1.7 m (7 Axis) - 1 no
- Trimos Height Master VT 600 - 1 no
- A wide range of digital and analog measuring instruments

MAKING A DIFFERENCE

TEAM TEKMAK

Technically qualified and skilled people with an average of over 5 years of experience are our asset. We foster and nurture an open culture where ideas are freely shared and discussed. With the direct involvement of the management, Tekmak continuously strives to improve performance at all levels.

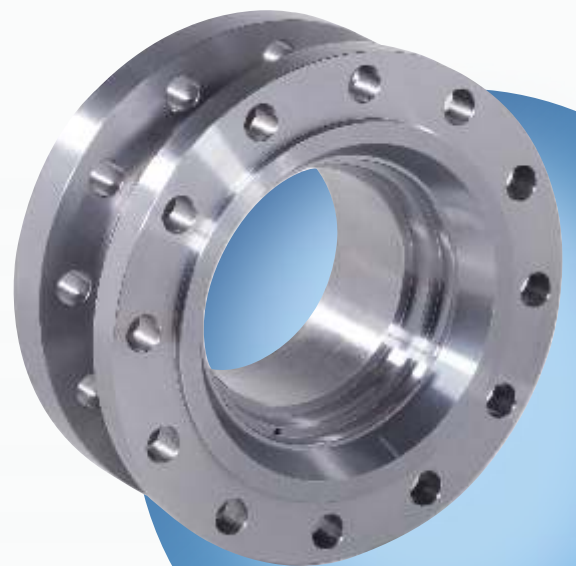

We focus on continuous learning to keep our team motivated and updated. A mix of internal and external faculty based training sessions on a wide variety of topics like 5S, Kaizen, Programming updates, etc are conducted.

BUSINESS BUILT ON RELATIONSHIP

The key in today's environment is to understand the needs of customers and cater to not just their requirements but exceed them as well. The international exposure of the top management, helps Tekmak understand these needs better and helps communicate effectively with all customers. We, at Tekmak believe in building and nurturing long-term association and this is proven by that fact that most of our customers are with us since inception.
